Profile

Frontend developer with 4+ years of experience building websites and web applications from scratch - from first layout concepts to production-ready products. My background is focused on creating modern, responsive interfaces, interactive user experiences, and scalable frontend architecture.

Over the years, I've worked on commercial products, educational platforms, AI platform websites, CRM system, healthcare websites, donation platform, and marketing-focused landing pages.

Comfortable working with modern JavaScript ecosystems and component-based frontend development. I enjoy combining clean UI, animations, performance, and good UX into products that actually feel polished. I also have experience mentoring and teaching frontend development.

English: B1–B2 - comfortable with documentation, technical communication, and day-to-day collaboration.

Education

**Master of Computer Applications - MCA,
Information Technology**
[Poltava State Agrarian Academy](#)

Sep 2022 - Dec 2023

Bachelor's degree, Information Technology
[Poltava State Agrarian Academy](#)

Sep 2020 - Jun 2022

Employment

Frontend Developer
[Nixtio](#)

May 2025

I work on delivering a wide range of client projects and developing internal company products that improve workflow efficiency and user experience. I use a diverse tech stack - from vanilla JavaScript to modern techs like React and Next.js, as well as build tools like Webpack. I have experience working both independently on solo projects and collaboratively within cross-functional teams to create scalable, maintainable, and visually appealing web applications.

Frontend Developer
[Poltava State Agrarian Academy, Ukraine](#)

May 2022

My job responsibilities include administering a Drupal 7-based website, covering the majority of the system's capabilities. My primary focus is on the layout and coding of new pages and the redesign of existing ones for the university website.

Robotics and programming teacher
[ROBOCODE, Poltava](#)

Mar 2025 - Oct 2025

As instructor I was teaching children the fundamentals of programming, robotics, and creative problem-solving. Designed and delivered engaging lessons that combined technical knowledge with hands-on projects. Through this experience, I developed strong communication, patience, mentorship, and leadership skills, as well as the ability to explain complex concepts in a simple and inspiring way.

Projects

Traxtio

2025 - 2026

[Nixtio](#) | [CRM](#) · [Frontend](#) · [Backend](#)

A custom CRM for lead management, designed and developed from scratch to production across both frontend and backend, with Trello API integration at the core of the workflow.

To The Moon

2025

[Nixtio](#) | [Marketplace](#) · [Frontend](#)

A full freelance marketplace platform connecting clients and freelancers through project discovery, task management, communication, billing, and workflow management. I worked across the product experience, building responsive interfaces and interactive flows for project browsing, task execution, profiles, finances, notifications, and proof-of-work submission.

Gradients

2025

[Nixtio](#) | [Agency](#) · [Frontend](#)

A bold digital agency website built from the ground up to bring a highly visual design system to life across responsive layouts, interactive sections, motion, and portfolio-driven content. I focused on translating the design into a performant, maintainable frontend while preserving the visual character and smooth user experience across devices.

Other projects which I didn't mention by different reasons
